

## Quality Assurance Specialist (m/f)

Full-time, Hamburg/Germany

### About PreSonus Software

PreSonus Audio Electronics has become known for delivering professional quality audio products at affordable prices to audio professionals, musicians and hobbyists around the world. The PreSonus staff in the sales, engineering, and customer service departments all have years of experience in professional audio as musicians and sound engineers which brings passion for music-making to every facet of the company. PreSonus' founder and President Jim Odom is credited with two RIAA Certified Gold Records, one Certified Platinum Record along with two Ampex Golden Reel Awards as a musician/producer/engineer.

PreSonus Software Ltd. is a new entity of PreSonus, based in Ireland with an R&D Facility in Hamburg, Germany. PreSonus Software is working on next-generation software solutions for music production on PC, Macintosh, iOS and Android, integrating perfectly with the PreSonus audio hardware product line. Its team has decades of cumulated experience in music software development and shares the same passion for music as the staff in other parts of the company.

### Summary

As part of our growing software development team, we are seeking an experienced and motivated Quality Assurance Specialist to report directly to the General Manager.

As a Quality Assurance Specialist, you have a key role as a member of our development team. You will work closely with the software developers as well as the other members of the QA team. Your main focus will be on testing our music creation software and plug-ins, as well as defining general test cases and taking part in the product planning and feature definition process.

### Duties and Responsibilities:

- Participate in software development process
- Conduct development-accompanying software testing
- Execute test cases and report comprehensive results
- Report and track software bugs, while verifying fixes as implemented
- Participate in feature definition and planning process
- Review product requirements, functional specifications, and design specifications to create comprehensive test cases for achieving high levels of test coverage
- Create and execute test designs and test cases that adequately test the functionality, compatibility, operability, and interoperability of a software application

## Qualifications:

- Minimum of 3 years of Software QA experience
- 5 years' experience working with music technologies (electronic musician, MIDI programming, sound design, recording, mixing, mastering, etc.)
- Extensive knowledge of classical music notation
- Working knowledge of Microsoft Windows, macOS, iOS and Android
- Good understanding of Quality Assurance processes and product life cycle
- Experience with a bug or ticket tracking system such as Jira / Confluence
- Excellent Networking and Computer troubleshooting skills required
- Strong initiative, personal accountability, and teamwork skills
- Excellent communication skills, both verbal and written (German and English)
- Passion for music, audio and multimedia technology

**Start date**      October 1, 2019
